SEBASTIAN ZAMBRANO

JUNIOR SOFTWARE DEVELOPER

Guayaquil, Ecuador | +593 99 813 4331 | sebastianzambrano2818@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL PROFILE

Junior software developer with hands-on experience delivering and supporting web, mobile, and desktop applications for small businesses. I work primarily with React, TypeScript, Python, PostgreSQL, and Flutter, and have experience gathering requirements, deploying solutions, onboarding users, and providing ongoing support.

TECHNICAL SKILLS

Development: React, TypeScript, JavaScript, Python, Flutter, Dart, Flask, FastAPI, Electron
Data and services: PostgreSQL, Supabase, SQLite, REST APIs, Edge Functions, Excel and CSV processing
Testing and tools: Git, GitHub, Playwright, Vitest, Vite, Tailwind CSS, Linux, Vercel, Docker
Applied technology: OpenCV, YOLOv8, Tesseract.js OCR and Power BI

EXPERIENCE

Actuariosa | Mar 2025 - Present

Software Developer

- Build internal Python tools and support data preparation for actuarial and commercial work.
- Created MxCorreo, a Windows utility that imports Excel and CSV data, removes duplicates, validates syntax and DNS/MX domains, and exports reports. It has processed more than 132,000 records in total; the first batch included 36,040 records and 24,604 unique addresses.

ESORIA Sistemas | Jan 2024 - Present

Co-Founder & Technical Lead

- Electronic security systems (CCTV): on-site assessment, structured UTP cabling, camera mounting, DVR/NVR configuration, and real-time remote mobile monitoring setup for business venues.
- Business IT technical support: diagnostic, preventive, and corrective maintenance for PC workstations, OS environments, and local networks, ensuring zero business downtime.
- Cybersecurity & data protection: automated encrypted backup policies, router firewall configurations, and operational network isolation.
- Commercial software engineering: delivered ContaNova (SaaS for SRI electronic invoicing and inventory) and custom POS platforms for hospitality and retail clients.

Electromecánica Bolívar | Feb 2026 - Apr 2026

Customer Service, Billing, and Inventory Assistant

- Supported customers, sales, electronic invoicing, and inventory operations; these workflow issues inspired the development of ContaNova.

SELECTED PROJECTS

ContaNova | *React, TypeScript, PostgreSQL, Supabase*
Commercial management and Ecuadorian SRI electronic invoicing platform used by businesses, with inventory, customers, reports, document delivery, and ongoing support.

Taller Jeldes | *Flutter, Dart, Supabase*
Mobile app and administrative dashboard rebuilt for approximately 15 users, including activities, photo evidence, attendance, and AI-assisted technical reports.

TechView | *Python, OpenCV, YOLOv8, Raspberry Pi*
Assistive computer-vision software with object detection and spoken spatial guidance. My contribution was the software; the team project received an honorable mention in January 2026.

SmartDocs | *React, TypeScript, Tesseract.js*
Client document-management application with authentication, storage, search, OCR, editing, version history, and sharing.

EDUCATION AND LANGUAGES

Education: BSc Computer Science, UEES - in progress since May 2026

Technical education: IT High School Diploma, Instituto Coello - Mar 2026

Languages: Spanish native; English intermediate B1

Availability: Full-time remote or hybrid
