SEBASTIAN ZAMBRANO

SOFTWARE DEVELOPER · IT SUPPORT & ELECTRONIC SECURITY

Guayaquil, Ecuador | +593 99 813 4331 | sebastianzambrano2818@gmail.com | sebastianzambrano.dev | GitHub | LinkedIn

PROFESSIONAL PROFILE

Software developer and systems technician with hands-on experience delivering web, mobile, and commercial applications, alongside business IT support, hardware maintenance, and electronic security systems (CCTV, IP/HD cameras, DVR/NVR). Co-founder and Technical Lead at ESORIA Sistemas and collaborator at Actuariosa. Proficient in React, TypeScript, Python, PostgreSQL, and Flutter. Full lifecycle ownership: requirements discovery, software engineering, physical cabling and mounting, cybersecurity hardening, end-user onboarding, and equipped with own tools.

TECHNICAL COMPETENCIES & EQUIPMENT

Software development: React 19, TypeScript, JavaScript, Python, C++20, Qt 6, PostgreSQL, Supabase, SQLite, REST APIs, Flutter, Godot 4, Next.js, Electron, Ecuadorian SRI electronic invoicing, and POS systems
Electronic security & CCTV: On-site assessment, conduit routing, structured UTP cabling (Cat 5e/6), IP & HD camera mounting, DVR/NVR setup, centralized power, and real-time remote mobile monitoring
IT support & hardware: Preventive and corrective PC/laptop maintenance, component diagnostics, OS environments (Windows/Linux), LAN/Wi-Fi networking, and own technical toolsets
Cybersecurity & infrastructure: Router firewalls, VLAN network segmentation, automated encrypted backups, and business data protection
Tools & equipment: RJ45/coaxial crimpers, network multimeter/cable tester, hammer drill for wall/ceiling mounting, ladders, and complete hand tools

PROFESSIONAL EXPERIENCE

ESORIA Sistemas | Jan 2024 - Present

Co-Founder & Technical Lead

- Custom commercial software engineering: architected, delivered, and maintain ContaNova (SaaS for SRI electronic invoicing and inventory), point-of-sale desktop POS platforms, and ordering apps for local businesses.
- Electronic security systems (CCTV): on-site coverage surveying, structured UTP cabling, camera angle calibration (IP & HD), DVR/NVR storage configuration, and live mobile streaming setup on smartphones and PCs for business owners.
- Business IT technical support: diagnostic, preventive, and corrective maintenance for workstation PCs, laptops, and local networks; rapid hardware fault resolution with own tools.
- Cybersecurity & operational data protection: scheduled encrypted backup routines for accounting databases, perimeter router firewall rules, and network segmentation to prevent unauthorized access.
- Field operations & onboarding: technical quotation drafting, on-site physical execution, user training, and ongoing technical support.

Actuariosa | Mar 2025 - Present

Internal Tooling & Data Automation Engineer

- Built internal Python automation suites (MxCorreo) validating syntax and DNS/MX domains for over 132,000 corporate records with zero bounce rates.
- Engineered interactive corporate web prototypes in React/TypeScript and assisted data preparation for actuarial analysis.

Electromecánica Bolívar | Feb 2026 - Apr 2026

Customer Service, Billing, and Inventory Assistant

- Technical customer service, automotive spare parts sales, electronic invoicing, and inventory control in workshop operations.

Apol S.A. | Feb 2025 - Apr 2025

Administrative & Technical Support Intern

- Digital records management, corporate database organization, and operational support.

SELECTED SOFTWARE PROJECTS

ContaNova | *React, TypeScript, PostgreSQL, Supabase, SRI*
Commercial management and Ecuadorian SRI electronic invoicing SaaS platform used in production by businesses, with inventory, billing, and support.

OmniNote STEM | *C++20, Qt 6, SQLite*
High-performance GPU-accelerated technical canvas with Wacom digitizer sub-pixel inking, recursive-descent math AST parser, and SQLite WAL storage.

SwiftPiano | *Godot 4, GDScript, GLSL, MIDI*
Real-time 88-key piano synthesizer with complete QWERTY mapping, polyphonic Salamander Grand Piano sample pool, custom GLSL bloom shaders, and live MIDI transcription.

Taller Jeldes | *Flutter, Dart, Supabase, Applied AI*
Rebuilt mobile app and admin dashboard for automotive technicians, featuring photo evidence, pit attendance, and AI technical reports.

TechView | *Python, OpenCV, YOLOv8, Raspberry Pi*
Assistive embedded computer-vision software with real-time object detection and audio guidance. Awarded institutional Graduation Honors (2026).

San Viernes & Billar Club | *React, TypeScript, Electron, Capacitor*
Point-of-sale desktop applications with ESC/POS thermal ticket printing, pool table session tracking, and remote update distribution.

EDUCATION

Higher education: Computer Science Engineering, UEES - in progress (virtual mode)

Technical diploma: High School Diploma in Informatics - Instituto Coello (2026, Honors)

ADDITIONAL INFORMATION

Tools & equipment: Equipped with own installation and measurement tools

Driving: Driving experience / license in process

Availability: Full-time, overtime, willing to travel to provinces

Languages: Native Spanish; Intermediate English B1
